

The Chesapeake Bay Program Partnership's Modeling Workgroup will coordinate a series of webinars to provide partners and stakeholders an insider's look at the overall Phase 6 model structure and important components of each Phase 6 model including how and why they were developed, what's different in the Phase 6 version, and how they will be applied in support of management decision making. These webinars are intended to assist the Partnership in the fatal flaw review of the Phase 6 suite of modeling tools throughout June and July 2017. The complete list of webinars are as follows:
