

CBP Water Quality Goal Implementation Team September 10th, 2012 Conference Call

Chesapeake Bay Program's Modeling Update

The scenario builder documentation reported that Bioswales and Bioretention on AB soils with underdrain have a reduction of 70% for TN and 75% for TP. These reduction percentages had been reversed in the watershed model. The correction was made on 8/16/12. The 2011 progress run had 129 acres of Bioretention and 733 acres of Bioswale.
