Long Term Actions and Decisions Log: Overview and Next Steps

Caroline Kleis, AgWG Staffer

Long Term Actions and Decisions Document

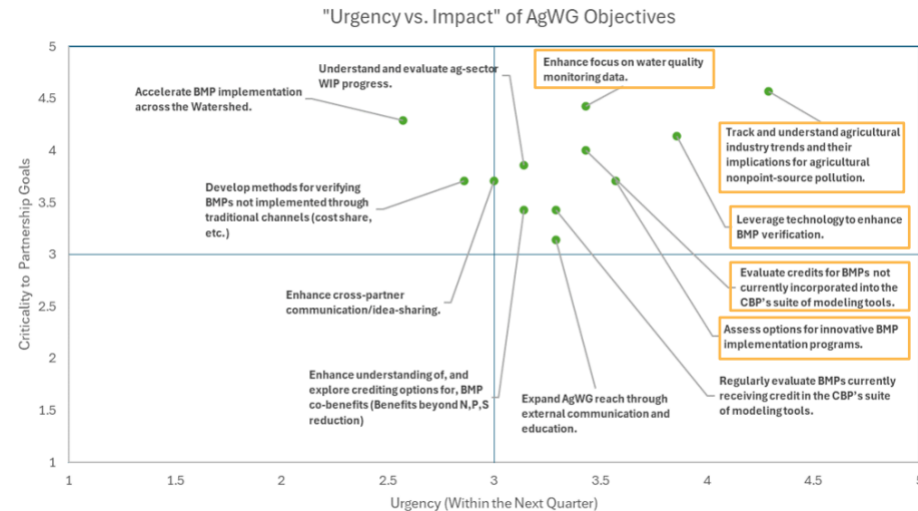

- Explored minutes documents for years available on Chesapeakebay.net (2010)
- Copied and pasted all actions and decisions, where applicable
- Designed for easy searching
- Updated list is linked on today's meeting page and intended to replace 2022-2025 version

What's Included?

- Workgroup meeting actions and decisions (where applicable)
 - Important caveat: This is not a *perfect* list. Records of actions and decisions prior to 2013 did not list actions and decisions in the same way. Links are provided where actions and decisions are not listed as such.
 - Marked as “no actions and decisions were recorded”
- Meeting date and year- easily clickable table of contents
- Link to meeting materials

Takeaways and Connections

- Themes: Heavy focus on BMP Expert Panels/BMP Development and refinements for Phase 6, joint meetings with other CBP workgroups and longer in person meetings
- Compliments our current planning process, avoids us reinventing the wheel

Next Steps

- This document will be posted to the webpage and replace the current version (years 2022-2025)
- This will be used to inform a “historical projects” document, outlining key projects the AgWG has been involved in
- Continuous improvement of documentation and materials

Discussion

- Is there a way to make this actions and decisions document more useful to you?
- Are there any items you'd like to see in the historical projects document and/or additional documentation that would be useful to you?
