

Citizen Science and the Chesapeake Bay Program's Water Quality Monitoring Program

Peter Tango
USGS @ CBPO

Mid-Atlantic Volunteer Monitoring Conference
August 7, 2015

Present discussions on directions for CBP
Citizen Science monitoring support include
3 themes linked to

Objectives of the ACB Workplan:

- Further document the status of tidal waters in nearshore areas
- Identify nutrient and sediment conditions in local watersheds
- Verification of selected BMPs

December 2015 Products for CBP under the new award

- Kick-off meeting with CBP! (Done 😊).
- Report that catalogues and prioritizes 100+ Citizen Science programs based on their capacities.
- Integration of data from 20+ such programs compatible with CBP monitoring networks
- A CBP–approved document outlining a three-tiered approach for uses of citizen science/non-traditional partner data.
- Quality Management/Quality Assurance Plan
- Training sessions and Cit Sci group contacts.

Thank
You
