AGENDA

1:00 Welcome, Introductions, Announcements – Peter Tango – USGS@CBPO, Coordinator

1:10 Rubric for Tier Determination and Inclusion of Data in the CMC Database – Julie Vastine, Jinnie Monismith (Alliance for Aquatic Resource Monitoring, ALLARM)

As the CMC team continues to develop the building blocks of its non-traditional monitoring project, it was identified that a rubric for classifying data collected in the watershed needed to be developed. As a result, the team built a dichotomous key to inform data classification. During the call CMC will present on its draft rubric and pose questions to the group for feedback.

2:00 Water Quality Attainment- Preview of WQGIT presentation on Bay indicator results update – Peter Tango (USGS@CBPO, STAR Coordinator)

Peter will provide a preview of the presentation being developed for the WQGIT that is an update on the latest results from the Multimetric Water Quality Standards Indicator. This indicator provides one estimate of attainment of dissolved oxygen, water clarity/SAV and chlorophyll a standards and used to track changes in Bay health.
