

# Examining different versions of CAST

Tom Butler, EPA

5/2023

# Explaining CAST

There are several recommendations for improving ag fertilizer data

It is preferred that we test and see the results of each recommendation

There are multiple versions of CAST

**We need to clarify which version of CAST will be used to test recommendations**

# Three versions

## 1 -Original

- Omitted a portion of agricultural fertilizer

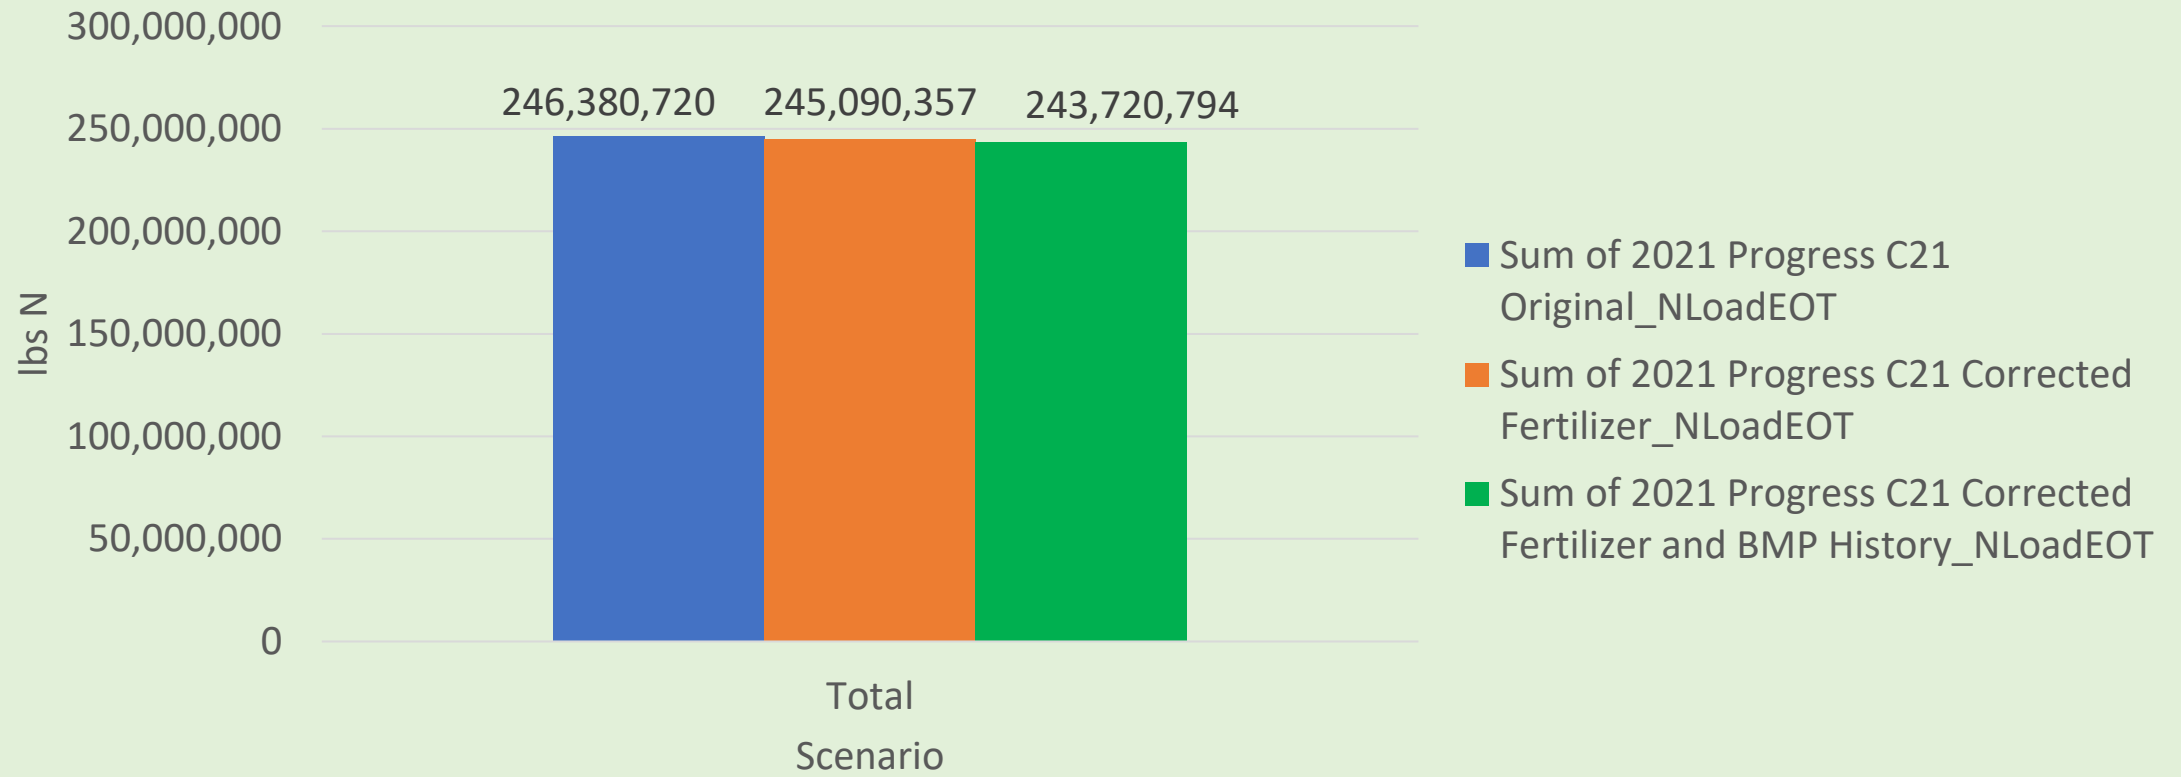

## 2- With corrected fertilizer data

- Added in the omitted portion

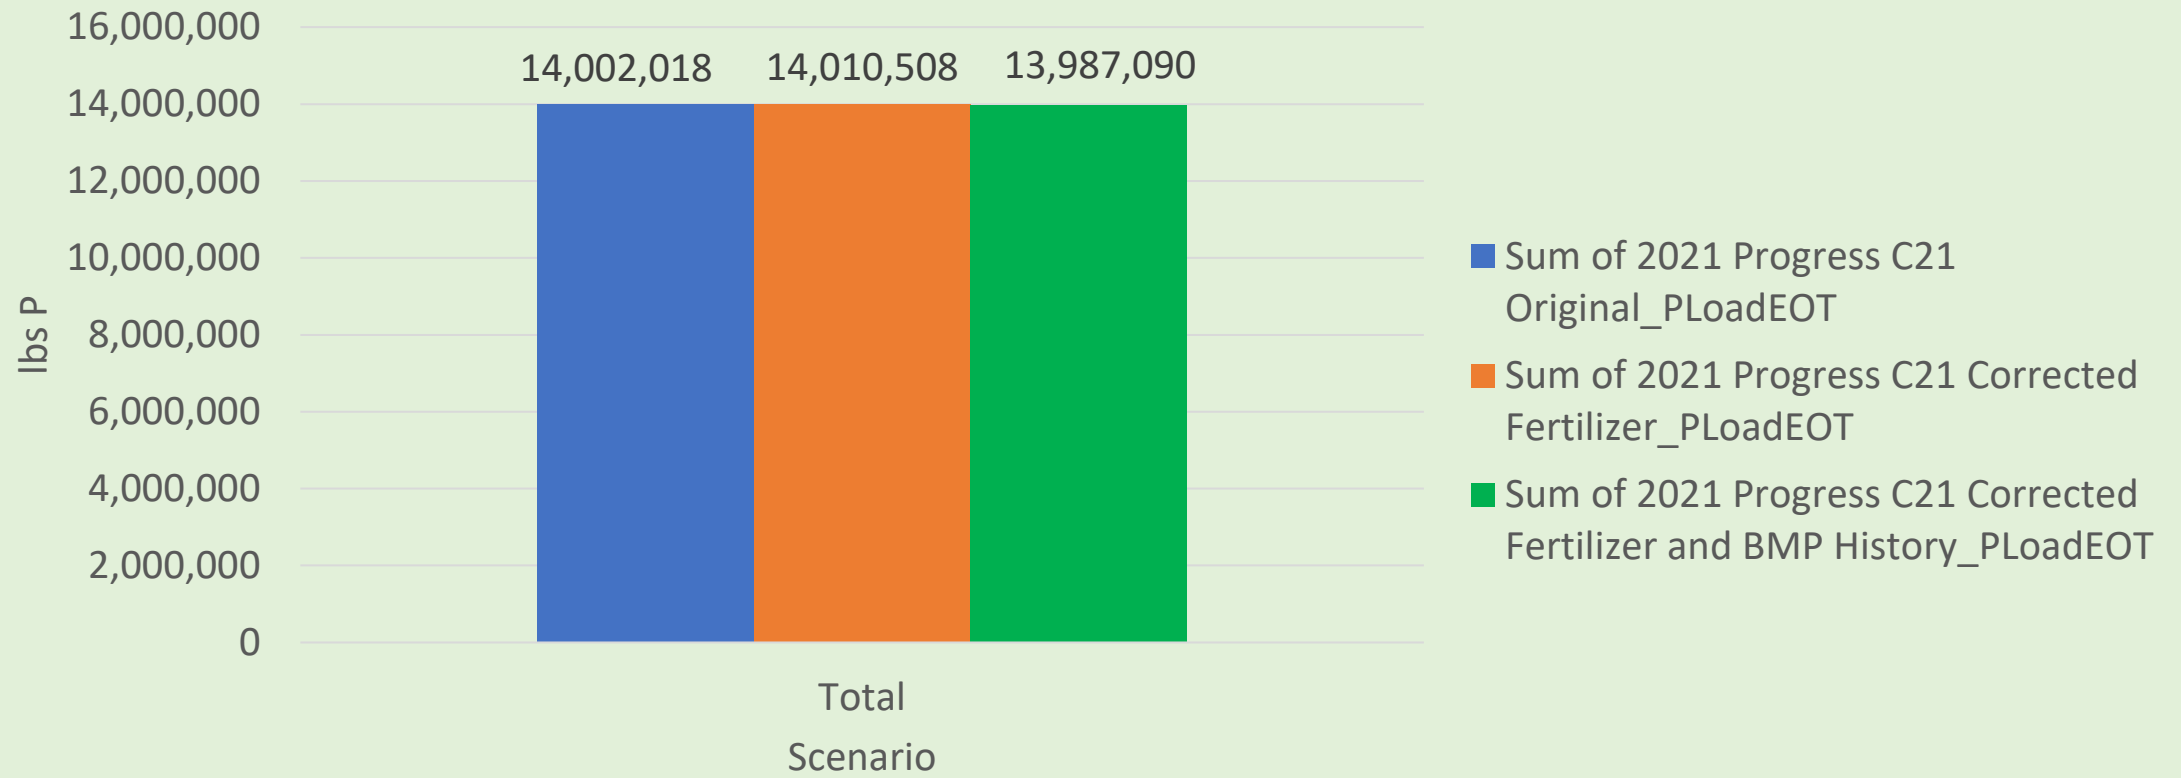

## 3- With corrected fertilizer data AND updated BMP history

- Added in omitted portion
- Updated the BMPs

## N Edge of Tide Loads

## P Edge of Tide Loads

And the winner is...

## 3- With corrected fertilizer data AND updated BMP history

- Added in omitted portion
- Updated the BMPs

# Next Steps

- Running the recommended ag fertilizer data fixes with this version.
- Improve the strength of recommendations.
