

**Fish Habitat Workplan Kick Off Conference Call Agenda**  
**Tuesday, June 28, 2016, 10:00 am – 12:00 pm**  
Call-In: (877) 985-7304; Pass Code: 6899520  
Webinar: <https://attendee.gotowebinar.com/register/8118456684835368705>

---

1. TetraTech Project
  - a. Sam Stribling will present the fecundity matrix and Potomac Sculpin literature review.
    - i. Discussion:
      1. How can we apply this matrix to our work?
      2. Is executive summary still relevant to the team? Should we continue to develop?
2. Workplan Overview
  - a. Review of workplan development, role of the Fish Habitat Action team, and major action items in the 2016-17 workplan.
    - i. Discussion:
      1. What actions would be most useful to the fish habitat team?
      2. How do we designate actions among team members?
3. Progress Updates
  - a. Provide the status of in-progress actions:
    - i. Compiling and synthesizing data on stressors to fish habitat with TetraTech
    - ii. Mapping high priority habitat from anadromous spawning areas in MD
    - iii. Identifying how the 2015 inland assessment may be used to characterize habitat stressors
    - iv. Discussion:
      1. What additional actions are in progress?
4. Near-Term Fish Habitat Workplan Actions
  - a. Review near-term fish habitat workplan actions and develop plans to address issues:
    - i. Review and utilize existing reports to identify priority species and habitat limitations
    - ii. Evaluate how land use change is impacting tidal fish communities by developing and applying thresholds of impervious cover Baywide
  - b. Discussion:
    - i. How do we approach these items?
    - ii. What resources and data are available to provide a foundation to start the process?
5. Monitoring and Tracking
  - a. Arrange a schedule for monitoring workplan actions and a framework for reporting progress.
