17

WHAT POSITION DO YOU HOLD? (E.G., PLANNER, ENGINEER, CONSULTANT, ETC.)

19 responses

Occasionally it may be helpful to include subject matter experts on highly specialized issues (solar)

17

ARE THERE ANY MEMBERS NOT CURRENTLY REPRESENTED IN THE LUWG THAT YOU THINK SHOULD BE ?

17 responses

Planning associations

Not really

Communications people

Consultants

Regional Planning and
Development Boards

Local Gov - County, Municipal

Wildlife/habitat people that use
the LU data

Restoration groups

No opinion

9

ARE THERE ANY MEMBERS NOT CURRENTLY REPRESENTED IN THE LUWG THAT YOU THINK SHOULD BE ?

17 responses

local government/planners

Private industry is lacking representatives.

Other workgroup reps

Landscape ecologists

There doesn't seem to be a whole lot of representatives with agricultural expertise.

EPA?

Land use planners

Land use change model

WHAT TOPIC DISCUSSED AT THE LUWG HAS BEEN MOST VALUABLE TO YOU AND YOUR WORK?

WHAT WOULD YOU LIKE TO HEAR MORE ABOUT AT OUR MEETINGS? WHO WOULD YOU LIKE TO HEAR FROM?

21 responses

What locals are using the data and how

How state agencies use the data statewide

Learning more about what the high-res data is telling us about the watershed and how it is changing as we/others continue to analyze and use it

applications of the data outside of CAST

Examples of land use data that have led to policy changes (could be from outside bay watershed)

local and ngo uses of the land use data, metrics, and CHWA

Local governments and high res land use applications

You're all doing a great job!

CAST

WHAT WOULD YOU LIKE TO HEAR MORE ABOUT AT OUR MEETINGS? WHO WOULD YOU LIKE TO HEAR FROM?

21 responses

Potential policy connections

Subject matter experts who can weigh in on specialized issues that affect LUWG decisions

Applications - I like the idea of seeing how members and people outside our group are using the land use data

Hearing directly from local governments about what is helpful and not helpful

Policy connections

All applicable applications of the data and like to hear from all of you. You individually bring different expertise to the table.

No strong opinion, existing content ok by me

Applications of the data, especially at the local level; How the data can help foster smarter growth at all levels; how the data and its implications can be communicated to decision makers

How the landuse feeds into the TMDL modeling and CAST--and ultimately how that impacts our state's responsibilities /accomplishments relative to water quality.

15

WHAT WOULD YOU LIKE TO HEAR MORE ABOUT AT OUR MEETINGS? WHO WOULD YOU LIKE TO HEAR FROM?

21 responses

CONTINUE opportunities for collaboration across workgroups for decisions affecting multiple workgroups

Continue discussions that help us get under the hood of the land change and water quality modeling

Historical trends can inform future land use planning decisions

MEETING STRUCTURE: WHAT IS WORKING AND WHAT ISN'T? IF IT'S HELPFUL, USE CONTINUE, STOP, AND START IN YOUR RESPONSE. FOR EXAMPLE:

15 responses

Keep it the same, I think it works well

START more interactive discussions

CONTINUE detailed agendas before the meeting

START incorporation of use cases into the agenda

The structuring is good on my end.

START discussions on how these data can impact policy

Continue quarterly meetings, start getting different voices heard, stop.....

Continue discussions of how land use update will be used in P7 CAST

Continue making connections to the model even if they are infrequent

10

MEETING STRUCTURE: WHAT IS WORKING AND WHAT ISN'T? IF IT'S HELPFUL, USE CONTINUE, STOP, AND START IN YOUR RESPONSE. FOR EXAMPLE:

15 responses

Keep quarterly virtual meetings, maybe once a year in person meetings, try to encourage more discussion

Continue local review

Quarterly schedule is recommended.

Continue to provide meeting materials in advance including agenda, PPTs, etc.; Continue having virtual meetings or at least a virtual attendance option; Continue quarterly meetings

Stop overly technical presentations although there haven't been that many recently

quarterly meetings are good. Provide slides as far in advance as practicable.

ARE THERE ANY EXISTING POLICIES OR LEGISLATION THAT COULD BE ENHANCED WITH LAND USE/LAND COVER DATA?

13 responses

Informing future land use planning

I think that's a great topic to explore

Informing stormwater regulations or policies

Conservation practices

Using LU change data to evaluate tree canopy loss or growth (especially for Stream Restoration or other BMPs)

Solar commitments

Land use planning; Climate change mitigation and adaptation; Stormwater and flood management, Forest conservation and non-forest tree canopy enhancement

Historical trends can help inform future land use planning decisions

Forest conservation

6

ARE THERE ANY EXISTING POLICIES OR LEGISLATION THAT COULD BE ENHANCED WITH LAND USE/LAND COVER DATA?

13 responses

Heat island policies

Resilience needs and practices for future precipitation concerns

Explore model local laws

Impervious surfaces management

6

IF DATA ISN'T PROVIDED TO YOUR JURISDICTION STATEWIDE ALREADY, WOULD YOU VALUE STATEWIDE DATA?

7 responses

Yes!

Yes! - NY

Yes

Yes would definitely value the
entire state mapped

Yes VA

Yes!

Yes
