

RESTORATIVE JUSTICE

Restorative justice is a theory of justice that emphasizes repairing the harm caused by criminal behavior.

It is best accomplished through cooperative processes that include all stakeholders. This can lead to transformation of people, relationships and communities

KEY ELEMENTS OF THE PROGRAMS

- *Real Job Skills – Pathways to Employment*
- *Community Understanding and Connection*
- *Education for the Participant*
- *Meaningful Work*
- *Civic Understanding and Obligation*
- *Projects that Transcend Time*
- *Ability to Perform the Work with Dignity*

Appreciation from those the work is done for....

PRE-TRIAL WORK CREW: KEEPING COMMUNITIES AND THE ENVIRONMENT CLEAN AND GREEN

Created and developed by Frank Rini: Pre-Trial Diversion Manager

- Individuals performing the job tasks are on the Pre-Trial Services Diversion Work Crew and are supervised by Correctional Staff
- Our Diversion Program participants are either assigned to: ACS (Alternative Community Services) or IPSA (Intervention Program for Substance Abusers)
- Most diversion participants are first time offenders charged with misdemeanor offenses which include such charges as: simple assault, theft, alcohol related citations and possession of controlled dangerous substances
- Most cases are eligible for expungement, upon successful completion of either program, ACS or IPSA

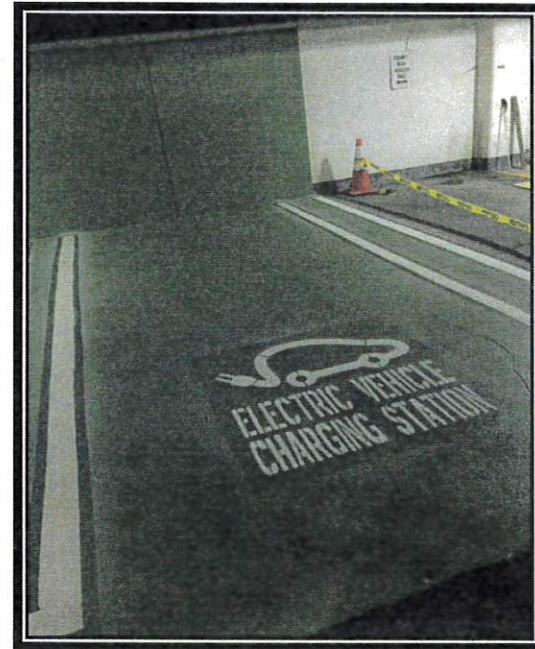

OUR WORK SITES

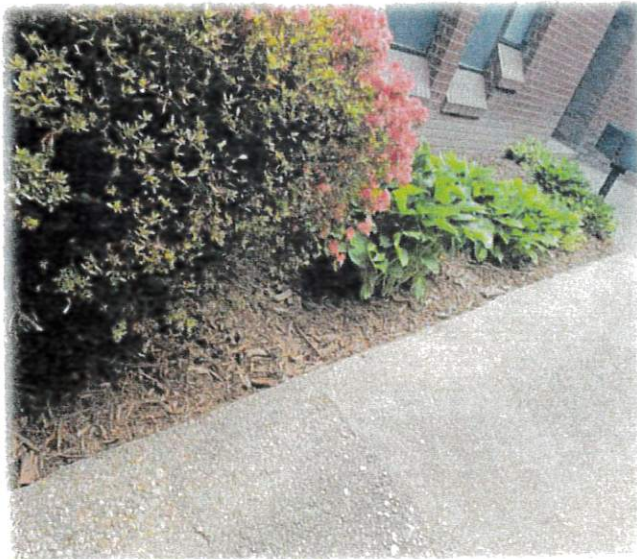

- All 21 county libraries
- County Facilities
- Bus Depot Facilities
- Department of Transportation Sites
- Wheaton Urban District
- City of Rockville
- GRAB (Graffiti Removal)

**Some job duties include:
trash/brush removal, park
maintenance, landscaping**

SUCCESSFUL PAINTING AND CODING FOR ELECTRIC CAR CHARGING STATIONS

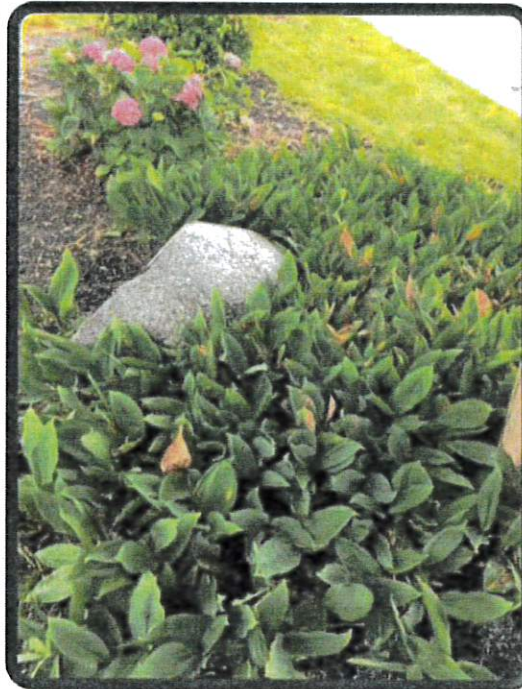

COUNTY FACILITIES

- This slide presents successful weeding, bush trimming and mulching
- The drain was cleared, so debris does not cause a back-up which could harm the facility and or environment

**PROPER MAINTENANCE OF TREES, PLANTS AND
FLOWERS ARE ESSENTIAL FOR THEIR HEALTH, WHICH
IMPACTS OUR ENVIRONMENT**

**OUR ROADSIDE AND PARK TRASH REMOVAL AIDES WITH:
DECREASED POLLUTION, TRASH ENTERING LOCAL
RIVERS/BAYS, PLANT GROWTH AND INCREASES OVERALL
CURB APPEAL**

KEEP THE ENVIRONMENT CLEAN

- Tons of trash end up along shorelines and floating in the region's waterways
- Plastic bags, cigarette butts, Styrofoam and other types of trash threaten to further harm wildlife, increase pollution and choke streams and rivers
- Clogged storm drains cause flooding and other environmental and safety hazards

Our community service work crew force assists in the elimination of the above, thus making the environment: cleaner, greener, safer and everyone healthier

REMOVING BRUSH AND DEBRIS

- This particular site became overrun with brush and trash. The drain became clogged due to brush growing into the drain and trash build-up
- This caused flooding, environmental and staff hazards

Our community service work force: removed trash, brush and landscaped. Successful in creating a smooth and uninhibited water run-off

FY16 – FY18 COMBINED WORK CREW STATS

- 24,594 combined number of bags of trash and debris removed
- 844 trips to county landfill
- 1,601 work crews used
- 10,028 work crew clients
- 60,168 work crew man hours
