

Beyond 2025 Projects

December 12, 2024

# Beyond 2025 Projects

**Purpose:** Identify actions needed to advance the EC Charge in the long-term

- Phase 1: B25 Steering Committee Report, Small Groups, Charting a Course to 2025, ERG
- Urgent and additional (not part of GIT/workgroup workplans)
- Cross outcome (e.g., climate, people, shallow water)
- Identified during review of outcomes and “Big Question”
- Initial GIT submission deadline of Jan.3, but iterative and dynamic process
- Management Board endorsed
- No additional resources

## Example: Priority Living Resource Habitat Area

- Description: Develop priority living resource habitat areas for 92 segments of the Tidal Bay
- Rationale: [CESR](#) report suggests that focus should be given to shallow waters/[living resources](#) in addition to meeting the goals of the [Bay TMDL](#). This activity will identify priority living resource areas and give scoring metrics to assist in prioritization of restoration and conservation effort
- End User: WIP/Milestone Developers - Will provide critical information to allow/support [tiered implementation](#) targets/focused restoration efforts
- Objective: Develop a habitat suitability model that focuses on shallow water
- Responsible Party: Fisheries GIT

## Example: Embedding DEIJ in CBP

- Description: Identifying urgent strategic needs to support embedding DEIJA in CBP work
- Objective: Build consensus on:
  - how to articulate our goals clearly in updated language for the Agreement that will resonate well and broadly,
  - how these principles can be embedded throughout all areas of CBP work,
  - how to identify metrics that can be achieved in a given time, and
  - how we should structure the work to support this work across the CBP as a new way of doing business in all outcome areas
- Supports People Recommendation 3

# Beyond 2025 Projects Process...moving forward

- January 3: Small, urgent list of projects to be discussed at January 16 Management Board Meeting
  - Project description, rationale, end user, objective, general timeline, referenced Phase 1 recommendation
- Goal Teams—continue to identify important projects and strategic needs, working together.
- Revisit iteratively with renewed focus in April/May
