SAV (August)																																																																							
LUMM (August)																																																																							
Protected Lands (August)																																																																							
Fish Passage?																																																																							
Toxics Policy?																																																																							

[illegible]

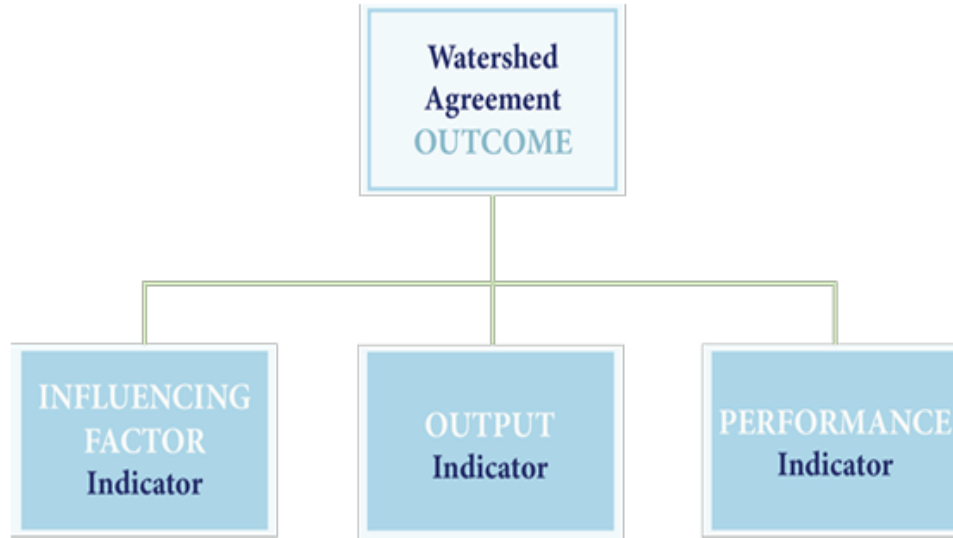

- Press Releases accompanying every update.
- Another PR – disseminate updates on the Agreement and will speak to where other non-Indicator updating Outcomes stand.
- No “unique” 2025 summary content on ChesapeakeProgress.

# Indicator Framework

---

---

---

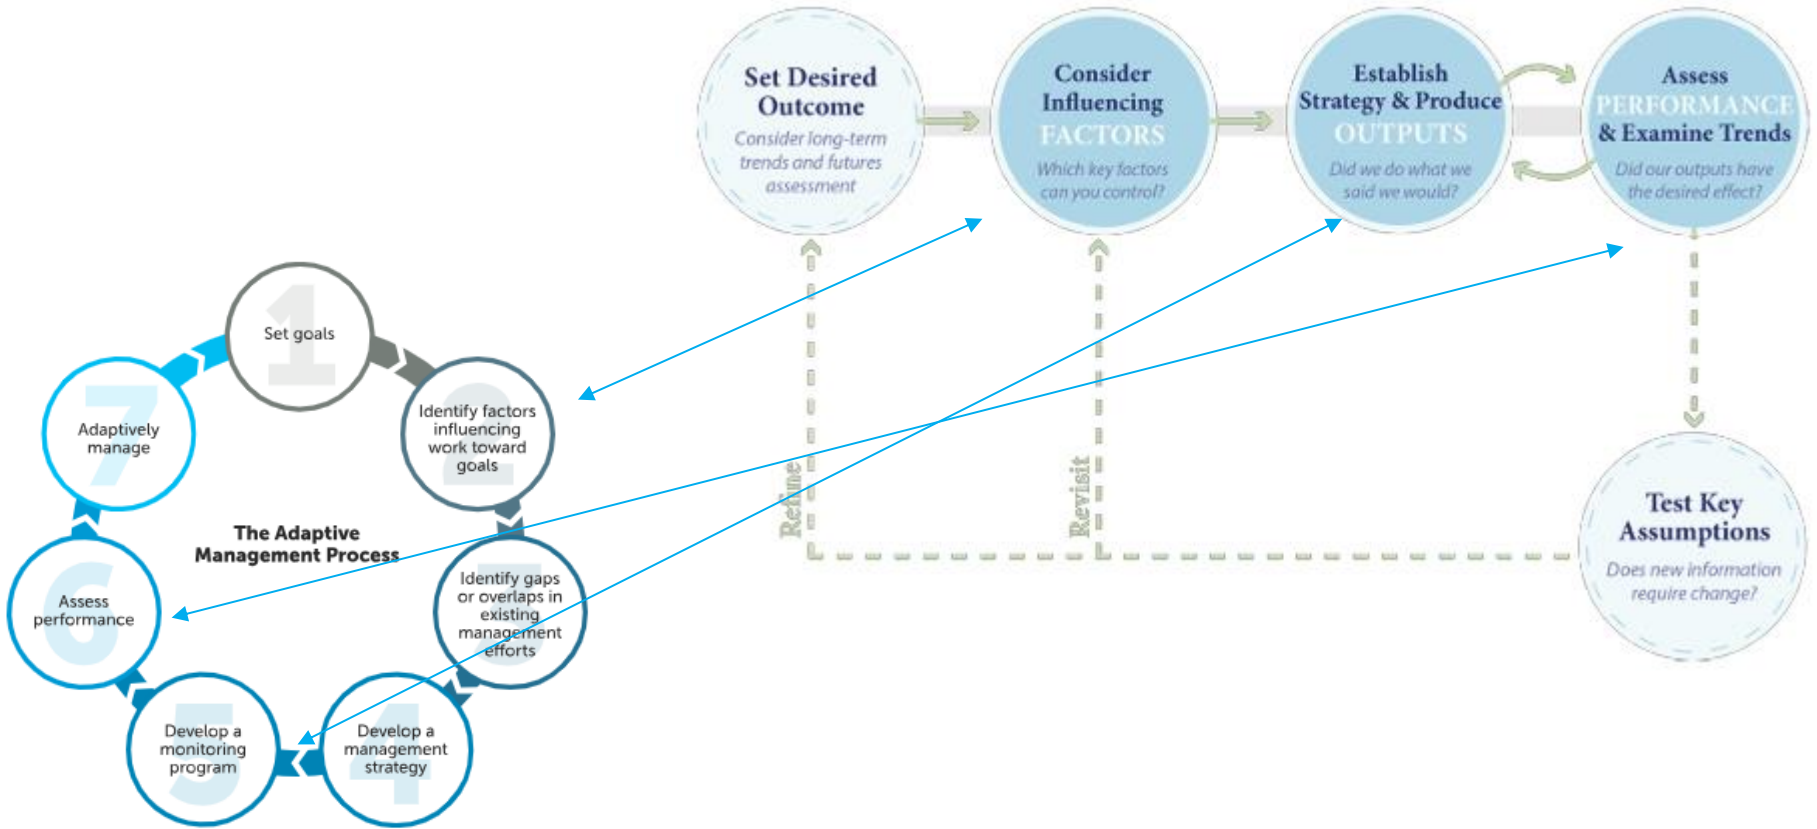

Current version  
established in 2015.

Nearly all Indicators are  
Performance focused.

Sought connection to a  
decision framework.

# Indicator - Decision Framework

# Discussion

1. How do we want to track progress toward new Beyond 2025 goals and outcomes?
  2. What is the relationship between a Watershed Agreement Target and an Indicator?
  3. What do we want to communicate to our audiences about our work toward these goals and outcomes?
  4. Do we want to retain “historical” content for outcomes we’re no longer working toward?
-
