

# Land use and fisheries:

## *Potential tools for development*

- *Improved linkages between land use and fisheries management*
  - *Engaging the planning community*
  - *Development of tools to influence and educate planners on effects of land based activities to fisheries*
  - *Development of spatial tools for fisheries management*

# Land use and fisheries:

*Communicating land activities effects,  
tool development*

# Land use and fisheries:

## *Spatial assessment*

*Can we use what we know to:*

- *Suggest locations for protected areas?*
- *Assess impacts to fishers from land and fisheries management actions?*

*What tools do we need?*

*What data do we need?*
