

# WELCOME AND OVERVIEW

Peyton Robertson  
Sustainable Fisheries GIT Chair  
June 17-18, 2013

# FISHERIES GIT PRIORITIES

- Deliver 2013 CBSAC report, discuss, and adapt management approaches to maintain a sustainable blue crab population
- **Adopt male blue crab conservation triggers as a point of reference**
- Continue and evaluate blue crab commercial accountability program in MD, and consider applying in VA and PRFC
- **Select priority tributaries for oyster restoration and develop tributary specific plans**
- Using the oyster metrics, identify a restored tributary and quantify ecosystem services and fishery benefits
- **Convene Invasive Catfish Task Force to coordinate science and develop policy options/recommendations**

# WHAT'S NEXT ON THE AGENDA?

- Summary of CBSAC 2013 Report
- Coordination of science and communication to managers
- Chesapeake Bay Program New Agreement
- Potential oyster ecosystem services
- Land use planning and natural resource decisions
- Invasive catfish management recommendations
- Striped Bass food web reference point for EBFM
- Technology to support future management decisions
