EFC Services and Assistance

- Technical Assistance
- Agriculture, Stormwater and Green Infrastructure
- Air Quality
- Climate and Energy
- Sustainability
- Program and Policy Analysis

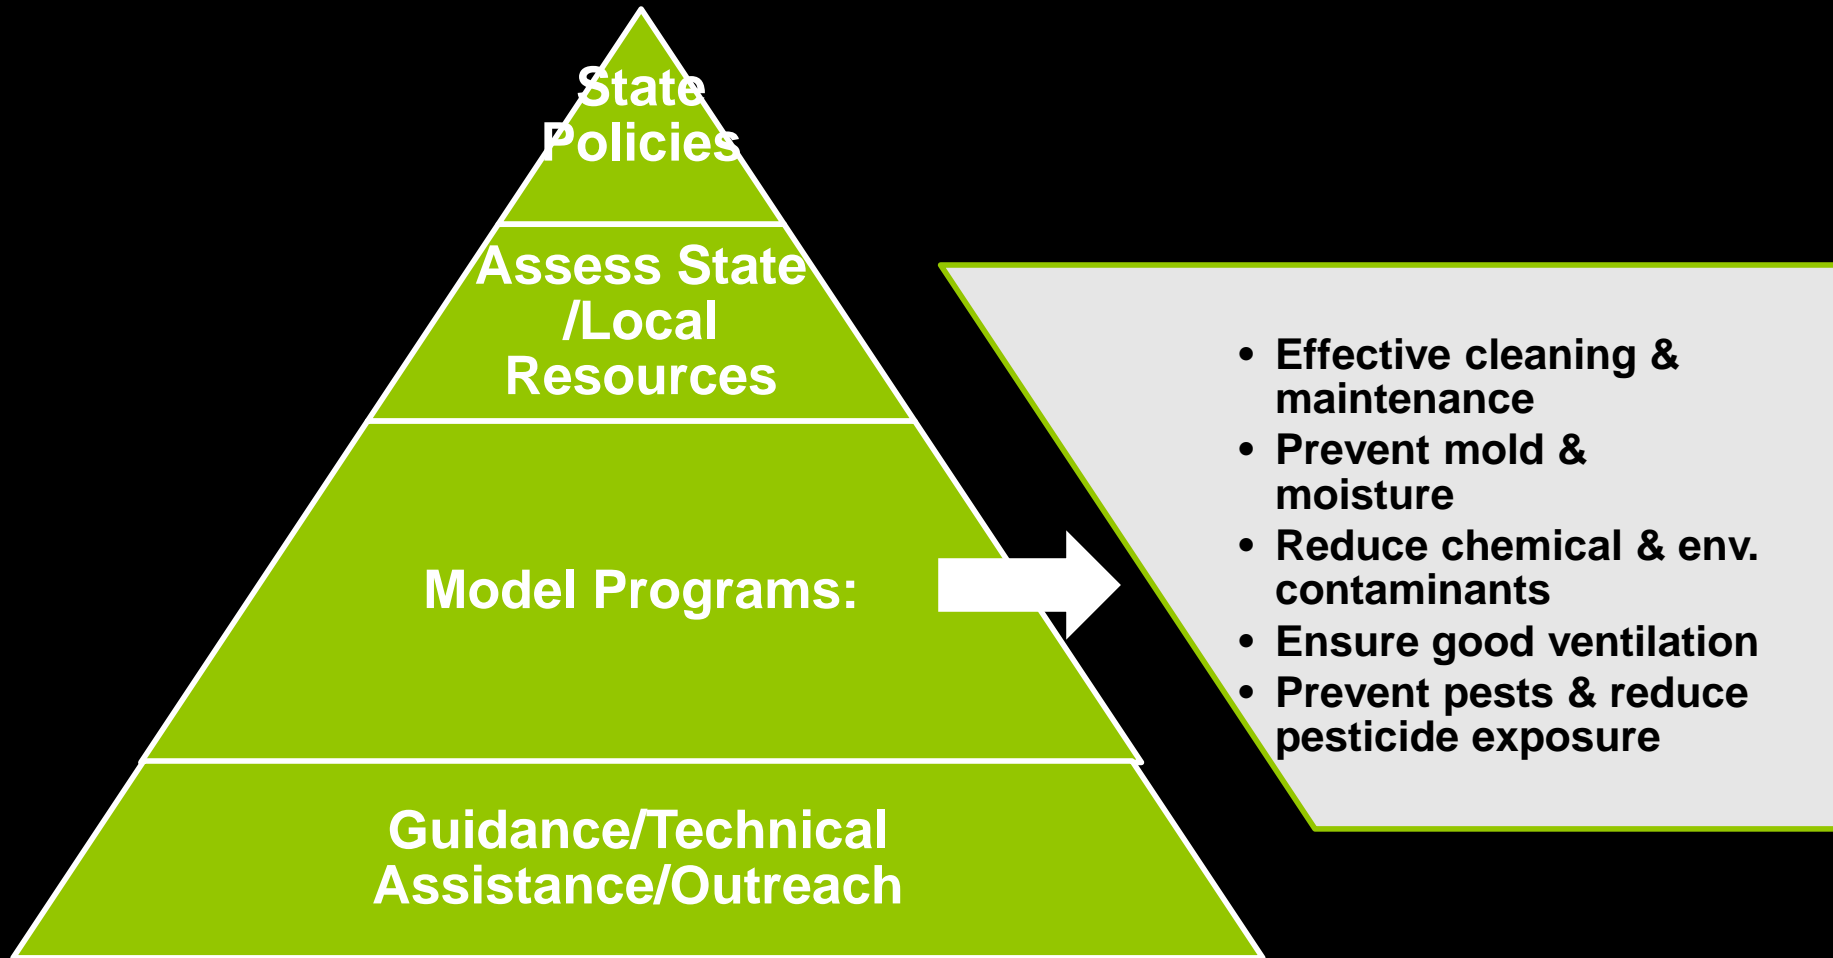

EPA-EFC Partnership: Why are we here?

- EPA developed State School Environmental Health Guidelines
 - **Guidance for states implementing K-12 school environmental health programs**
 - **Model K-12 school environmental health program**
 - **State Case Studies**
- EFC receives funding from EPA R3 to support sustainable schools initiatives in Mid-Atlantic

Basic Elements of a State School Environmental Health Program

Resource Inventories

Policies and Legislation

Water Resources - Stormwater Management, Water Conservation

Climate Change Mitigation and Energy Conservation

Solid and Hazardous Waste Reduction - Recycling, Composting, Chemical Management

Responsible Transportation

Schoolyard Greening / Habitat Restoration / School Gardens

Farm to School, Nutrition, Physical activity

Healthy School Environments - Green Cleaning, Pest Management, Asthma, Allergy

Environmental and Sustainability Education

Grant/funding program

Sustainable Schools Landscape

Who Am I?

During the 2014-15 school year, this jurisdiction awarded \$300,000 in grants to support 21 school gardens

District of Columbia: Policy

Sustainable DC Acts

Anti-Idling Law

DGS School Environmental Programs

DDOE Green DC Schools

Green Ribbon Schools

DC Greenworks – green
roofs, rain gardens, cisterns

DDOE Riversmart Schools

DC Environmental Education
Consortium – Schoolyard Greening

DC: SCHOOL SUSTAINABILITY PROGRAMS

DC Safe Routes to School

DC School Garden Program

OSSE Farm to School Program

DC Green Schools Challenge

DCPS Master Facilities Plan

DC Greens Farm to School Network

Common Themes Across Jurisdictions

- Need state-wide platform to share best practices, tools, training, and other resources
- Need increased collaboration/coordination among agencies and organizations implementing programs
 - **Enforcement of laws/policies and curriculum to facilities/grounds**
 - **Create better understanding /connections between health/facilities/education**
- Leadership from State Departments of Education is critical
- Need funding to support implementation of laws/policies: unfunded mandates have limited ability to affect change
- LEA buy-in is critical

Common Themes (cont.)

- Need for measurement
 - **Demonstrate cost savings**
 - **Establish other outcome measures**
- Need increased outreach/communication to schools & wider community regarding:
 - **Existing laws/policies**
 - **Available programs/resources/tools**
- Need teacher “champions”
- Engage students in school sustainability practices: older students can lead a culture change
- Show schools good examples: create inspiration

Green Ribbon Schools

Efficient
