

# Toxic Contaminant Workgroup, Latest

# Elements of Research Strategy

- (1) Fish and shellfish safer for human consumption;
- (2) Contaminants degrading the health, and contributing to mortality, of fish and wildlife;
- (3) Sources, occurrence, and transport of contaminants in different landscape settings;
- (4) Provide science to help mitigation contaminants, and emphasize the co-benefits with nutrient and sediment reductions.
- (5) Issues of emerging concern

# Issues of Emerging Concern

## Previous issues

- Microplastics
- UOGs
- Pollinators

## Additional issues

- HABs
- PFASs
- Road Salts
- Coal ash
