

Stream Restoration FAQ

Urban Stormwater Workgroup

August 15, 2017

How'd We Get Here

- **May 2013:** Stream Restoration Expert Panel Report is approved
 - **September 2014:** Test Drive results and report edits approved
 - **February 2017:** USWG presentation on proposed FAQ
 - **March 2017:** Stormwater Retreat session on stream restoration
 - **June 2017:** Final Draft Phase 6 Model released for review
 - **August 2017:** Draft FAQ document released for review
- 

What's in it?

- ▶ **Project Eligibility**
- ▶ **Questions about Calculating Reductions**
- ▶ **What's Changing in Phase 6**
- ▶ **Design Example**

What's not in it yet?

- ▶ **Second Design Example**
- ▶ **Final information on sediment delivery simulation in Phase 6**

A word on sediment delivery

- ▶ Concern was expressed that there are spatial differences in stream bank loads due to upland land uses that were not adequately captured in the draft Phase 6 Model
 - ▶ CBPO is adding stream source ratio loads to see if this improves
- ▶ A new approach is also being considered for how to set delivery factors
 - ▶ Currently under discussion by CBPO's Modeling Subcommittee

Next Steps

- ▶ Please review the Stream Restoration FAQ document and provide feedback by **August 31, 2017**
 - ▶ The FAQ will be updated once the Phase 6 Model is approved and the USWG will be briefed on any changes
-
