

Chesapeake Bay Program
A Watershed Partnership

Urban Stormwater Workgroup Meeting

Tuesday, August 15, 2017

10:00 AM to 12:00 PM

Call-in Number: 866-299-3188; **code:** 267-5715

Adobe Connect: <http://epawebconferencing.acms.com/uswg/>

10:00 Welcome and Review of June 27 Meeting Minutes. Norm Goulet (Attach A).

10:05 Announcements

- USWG Proposal on PEDs/RDM for WQGIT (Schueler/Goulet)
- MTD Project and Face to Face Meeting (Goulet)
- Bay Stormwater Network Survey to be Released (Schueler)
- Agricultural Stormwater EPEG (Schueler)
- CSN Fall Webcast Scheduled (Schueler)
- Listening Sessions with State Stormwater Agencies (Schueler)
- Headwater State Stormwater Workshops and Regional Forums (Schueler)
- Other Announcements

10:25 Stream Restoration FAQ Document

T. Schueler, CSN (Attach B1/B2/C)

CSN and CWP have drafted a "frequently asked questions" document for the stream restoration crediting protocols that also includes design examples that show how they are applied to real stream restoration projects in the Bay watershed. The document will also describe how the stream restoration practice will be represented in the Phase 6 watershed model, in terms of sediment delivery from the project reach to the Bay watershed (these modeling decisions are expected to be finalized by early Fall). CSN will present the highlights from the FAQ document and request initial review by members. The document will be finalized by the Sept USWG meeting along with the modeling decisions.

10:45 Implications of the Phase 6 Watershed Model for the Urban Sector (Schueler/Goulet) (Attach D)

This will include a short presentation on the major changes in land use and nutrient loading for the urban sector in the shift from Phase 5.3.2. to the Phase 6 watershed model. Norm will review technical comments and fatal flaw issues that were submitted in July. Members will also have an opportunity to discuss the implications of the new model on the urban sector,

11:15 Conclusion of Fatal Flaw Analysis and Next Steps in the MPA (Goulet)

Norm will guide the work group on a discussion on whether we can make an affirmative decision on whether there are no fatal flaws in the Phase 6 watershed model with respect to the urban sector. Norm will then discuss the next modeling steps in the mid-point assessment that will be used to establish the final load allocations.

11:50 September USWG Agenda Item Planning – N. Goulet

12:00 Adjourn
