

Data Wish List

Biosolid

- Total pounds generated by each POTW (link thru NPDES permit) and its associated destination county/ies.
- Total pounds generated by septic pumpage in each county that is not sent to a POTW
- Total pounds applied to the land in each county (this would account for pounds transported into the watershed AND pounds transported county-to-county)
- Total pounds landfilled or removed from in another way in each county (not land-applied and not transported)
- Moisture content of pounds applied to the land in each county
- Nutrient concentrations of pounds applied to the land in each county (Mineralized N and P, Organic N and P, Phosphate, NO₃ and ammonia)
- Total acres receiving biosolids in each county
- Total acres of nutrient management lands receiving biosolids in each county
- Types of crops that receive biosolids (acres if available)
- Months in which biosolids may be applied for each crop type

Spray Irrigation

- Monthly total pounds by spray irrigation from a WWTP
- Total acres and location receiving the wastewater irrigation
- Types of crops that receive the wastewater irrigation
- Year spray irrigation began
- Adjusted fertilizer application when spray irrigation is applied
