

Refresher: What is the Strategy Review System (SRS)?

- It is how the CBP partnership applies adaptive management toward achieving the 2014 Watershed Agreement's goals & outcomes
- GITs developed Management Strategies, which “provide broad, overarching direction and are further supported by Strategy Review System documents”
- SRS documents: Logic & Action Plan, Narrative Analysis, and a Presentation
 - All 3 needed for Quarterly Progress Meeting (QPM)
 - After the QPM, a new 2-year LAP is developed, and the Management Strategy is also revised as needed; new and existing Science Needs are assessed

31 outcomes organized into 7 “cohorts”

- Aquatic Life
- **Clean Water Cohort**
 - Forest Buffers (moved for this cycle)
 - Toxic Contaminants Policy and Prevention
 - Toxic Contaminants Research
 - **Water Quality Standards Attainment and Monitoring** (lead: STAR, shared Management Strategy w/ WIP outcome)
 - **2025 Watershed Implementation Plans** (and 2017 WIP outcome )
- Climate Change and Resiliency Cohort
- Healthy Watersheds
- Local Action
- Next-generation Stewards
- Stewardship

2022 SRS Roadmap

August 11, 2022

- ~~First draft of Narrative Analysis (NA), Logic and Action Plan (LAP), and PPT due~~

1

September 15, 2022

- Management Board (MB) Quarterly Progress Meeting (QPM)

3

OCTOBER 31, 2022

- Public and signatory feedback begins

5

Science needs

New LAP & Revised MS

2

August 18, 2022

- ~~Dry Run~~
- Final Narrative Analysis (NA), Logic and Action Plan (LAP), and PPT **due on September 1st**

4

OCTOBER 27-28, 2022

- STAR Science Needs
- Near- final SRS materials due (MS, LAP)

6

DECEMBER 7, 2022

- Final SRS materials due
