# Historic BMP Cleanup for Phase 6

- Animal splits by county were already provided by VA and WV. Other states chose not to submit.
- **August 15** - Acres of permitted, concurrently, disturbed construction acres and harvested forest acres for all years (1984 – 2016) if you have not already provided them.
- **September 1** - BMPs in Phase 6 format for all years (1984 – 2016)
  - Please, please, please review BMPs from the draft calibration using either CAST or the files on the password-protected site. There are many cases where BMPs are being over-reported, likely due to errors. Examples: Stream Exclusion in PA in later years; DE NM in later years

# Notes about Historic BMPs

- Please, please, please review BMPs from the draft calibration using either CAST or the files on the password-protected site. There are many cases where BMPs are being over-reported, likely due to errors. Examples include: Stream Exclusion in PA in later years; DE NM in later years
- % can be submitted for many BMPs, and is recommended for harvested forest and erosion and sediment control.
  - If reporting with %, report only 1 per county or other specific geographic area. Example: do NOT report % conservation tillage at state AND again % conservation tillage at county as this will result in 0 credit.
