Progress Validation Reports

Watershed Technical Workgroup

Jessica Rigelman, J7 Consulting LLC, Chesapeake Bay Program Office

Introduction

- Reports are run for all Progress runs to help ensure data quality.
- Reports currently identify warnings and errors in:
 - NEIEN Inputs
 - Credit Duration
 - CAST Inputs

<https://cast.chesapeakebay.net/Home/TMDLTracking#progressReportingSection>

New Error Messages

- Four new messages have been added for the NEIEN Inputs:
 1. **BMP implementation date is past the end of the progress period.** (This will only be a count in the error summary worksheet).
 2. **Annual BMPs are not eligible for credit in the current progress year.** (This will only be a count in the error summary worksheet).
 3. **BMP not found in the Appendix.**
 4. **Missing inspection status for the latest inspection date.**

Potential Duplicates

- A worksheet has been added to show potential duplicates.
- The records are only flagged for your review and are not treated as errors in the processing.

Potential Duplicates Continued

- Duplicates are where there is more than one record where the following fields are the same:
 - StateUniqueIdentifier
 - State
 - AgencyCode
 - BmpName
 - CastBmp
 - CastLocation if no lat/long otherwise lat/long is compared
 - MeasureName
 - MeasureValue
 - ImplementedDate

Decision

- To what extent does the WTWG agree with the following: ***The WTWG approves the addition of the Potential Duplicates worksheet to the Progress validation report.***
