# Upper Susquehanna Watershed Progress Dashboard

Chesapeake Bay Watershed Technical Workgroup

6/5/2025

# Chesapeake Bay & NY

Will Parson/Chesapeake Bay Program

## Purpose of the Dashboard

Access data relevant to the Chesapeake Bay TMDL and Watershed Implementation Plan for:

- BMP implementation
- Nutrients & sediment delivered by sector
- Nutrient concentrations at nontidal network monitoring stations
- NYS DEC biomonitoring
- Reference layers

US Fish and Wildlife Service Northeast Region

The screenshot shows the 'Upper Susquehanna Watershed Progress Dashboard' with several key components and annotations:

- Top Navigation:** Includes 'HUC 10 Selector' and 'Biomonitoring Date Selector'.
- Left Sidebar:** Contains a 'Legend' section and a 'Nontidal Network Selector' section. An annotation 'Arrow opens text sidebar' points to a small blue arrow icon in the sidebar.
- Main Map:** A large map of the Upper Susquehanna Watershed area, showing various sub-watersheds and cities like Rochester, Syracuse, and Utica. The word 'Map' is written in the center.
- Right Panel:** Contains two main sections:
  - HUC 10 BMP Progress:** Includes a dropdown for 'Select HUC 10 Watershed(s)', a 'Cumulative' section with a list of BMPs (e.g., 'HUC 10 BMP Progress Serial Charts'), and an 'Annual' section with a list of BMPs (e.g., 'Nutrient Management Plans Core for Nitrogen').
  - Nutrient Loads and Concentrations:** Includes a dropdown for 'Select HUC 10 watershed(s)', a 'CAST Nitrogen Loads' section, and a 'Nutrient Progress Serial Charts' section with a list of NTN metrics (e.g., 'NTN TN Concentration').
- Footer:** Includes the text 'EPA, USGS | data.pa.gov, Esri, HERE, Garmin, FAO, NOAA, USGS, EPA, NPS' and 'Powered by Esri'.
