

WQGIT Submersion Series (2024)

Technical Assistance and Capacity at the Local Level

The Submersion Series is a new quarterly discussion series hosted by the Water Quality Goal Implementation Team (WQGIT) to convene for exploratory, collaborative conversations on topics that rarely find sufficient time within our typical monthly meeting schedule. These conversations will seek to dive under the surface and challenge us to contribute and exchange ideas as partners with varied lived experiences. The thoughts or questions expressed in this shared space are our own and do not necessarily reflect the views of our organizations, the WQGIT and its leadership, or the Bay Program.

Please join us for a webinar focused on local level capacity building in the Chesapeake Bay watershed. Speakers from different perspectives and sectors from across the watershed will be presenting on the challenges, barriers, opportunities, and current actions in building and maintaining local capacity and technical assistance. The webinar will include time for questions and open discussion. When you register, you are encouraged to please provide your thoughts on how you think about technical assistance and building capacity, and what you hope to get out of this webinar.

Moderated by:

Erin Trouba (Penn State Extension)
Ruth Cassilly (U. of Maryland)

SPEAKERS:

Jennifer Fetter
(Penn State Extension)

Dr. KC Filippino
(Hampton Roads Planning District Commission)
