WV	166,809	167,953	-1,144	-0.68%

- CBP typically removes estimates of construction acres from estimates of urban acres. This was not done for 2015.
- The correction resulted in less than 1% difference in urban acres in each state.
- States will have another opportunity to review land use projections this October following submission of afo/cafo splits and harvested forest lands.
- Looking for approval to make this correction as the land use was already approved for the 2015 Milestones.
