

Phase 6 Model Overview

Gary Shenk

CBPO

Local Area Targets Task Force

8/30/16

Percent Effort in 2010 TMDL for Selected Basins

Loads by State and Basin

State-Basin WIPS Developed

Base Decision of the TMDL: All areas have to do a certain percentage of what is possible to do

Targets set and evaluated using the CBP watershed model

WIPS Developed using the CBP watershed model

Loads by State and Basin

State-Basin WIPS Developed

Local Area Targets

2 General Methods

1. Set a Numeric Goal
2. Set an Implementation Goal

Loads by State and Basin

State-Basin WIPS Developed

Local Area Targets setting a numeric goal

Set a percentage of what is possible at the smaller scale

Loads by Local Area

Targets set and evaluated using the CBP watershed model

Loads by State and Basin

State-Basin WIPS Developed

Local Area Targets setting a numeric goal

Evaluate the WIP in the local area

Loads by Local Area

Targets set and evaluated using
the CBP watershed model

Loads by State and Basin

State-Basin WIPS Developed

Local Area Targets

Set an implementation Goal

Apply the State-Basin WIP to the local area

Implementation Targets by Local Area

Targets evaluated using implemented acres
