

EPA's Goal Implementation Team Funding Program

FFY 2022

- Fill key gaps that address important factors affecting goal and outcome attainment
- Demonstrate how the proposed project would support, directly or indirectly, the achievement of one or more related Outcomes
- Projects should be support tools or analyses that will make restoration, protection, and stewardship more effective in the future
- Projects should be unique and not duplicative
- Previously funded projects have generally been less than \$90,000
- Fund is administered by the Chesapeake Bay Trust

GIT Technical Lead

- Develops the Table 1 content (if involved at this point) and Table 2 details with input from other GIT Preparers
- Works with the Trust to refine and finalize a detailed scope of work
- Serves as a reviewer for all proposals submitted in response to their specific scope of work
- Manages the technical aspects of the awarded project and interfaces directly with the contractor throughout the project life
- Shares information, lessons learned and/or final deliverables across the CBP
