# Fish Passage Workgroup Updates

Spring Habitat GIT Meeting May 1, 2024

Co-Chairs: Jim Thompson and Ray Li

#### Outcome:

Continually increase access to habitat to support sustainable migratory fish populations in the Chesapeake Bay watershed's freshwater rivers and streams. By 2025, restore historical fish migration routes by opening an additional 132 miles every two years to fish passage. Restoration success will be indicated by the consistent presence of alewife, blueback herring, American shad, hickory shad, American eel and brook trout, to be monitored in accordance with available agency resources and collaboratively developed methods.

### Strategy Review System:

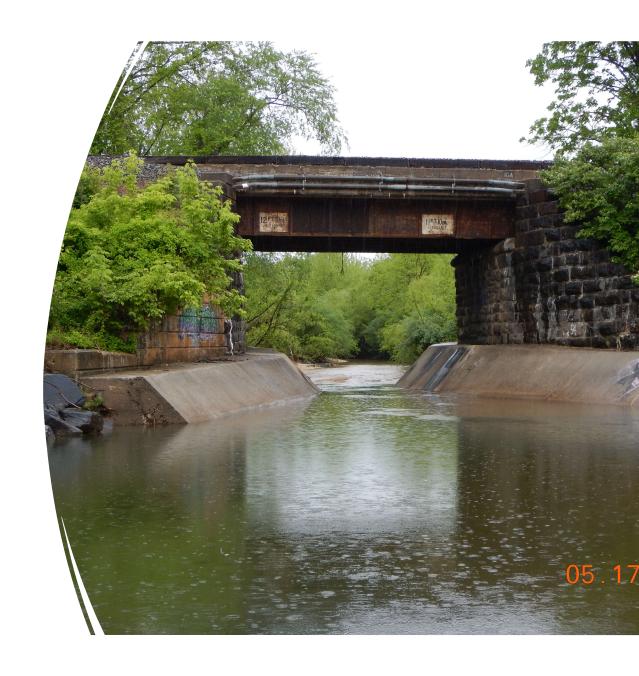

- Quarterly Progress Meeting on December 14, 2023
- Looking Back 2022-2023:
  - Did not achieve outcome
    - COVID 19
    - Landowner willingness
    - · Funding and staff capacity
- Looking Forward 2024-2025:
  - Outlook on course
    - COVID 19
    - Additional funding through BIL
