10:15 Turfgrass Fertilizer Application Method for CAST-21. David Wood, CSN

At the January USWG meeting, Jeff presented a recommended method for smoothing the raw fertilizer data received from AAPFCO prior to applying it to turfgrass acres in the watershed. Following the meeting, outreach was conducted to members of the Ad-Hoc Task Force, who agreed to seek a decision. At this meeting, David will give a short recap of our previous discussion and the group will seek approval for a new urban fertilizer application method.

Decision Requested: The USWG will be asked to approve a method for smoothing fertilizer application data to inform turfgrass loading rates in CAST-21. This decision will only be applied to CAST-21 and will be revisited for the Phase 7 Model.

10:45 Adjourn.
