

## Urban Stormwater Workgroup Meeting

**Tuesday, March 18, 2025**

**Workgroup: 10:00 AM – 12:00 PM**

**Teams Link: [Join the meeting now](#)**

**Meeting ID: 213 650 623 15**

**Passcode: zw2zZ9dc**

**Phone: +1 202-991-0477,,428488576#**

---

**10:00 Welcome and Review of December Meeting Minutes.**

Norm Goulet, Chair.

**10:05 Announcements and Updates**

- Update on STAC Workshop Proposal
- UNM Panel Update
- “Beyond Bean Counting” Goal Implementation Team Funding Project

**10:15 Priority Urban BMPs for Climate Resilience Analysis**

David Wood, CSN and Krista Romita-Grocholski, RAND

A project team is currently seeking to quantify the performance of agricultural & urban BMPs in the Chesapeake Bay watershed under current and future climate scenarios. In order to focus that analysis, the USWG will be asked to identify a list of priority BMPs for evaluation. Krista and David will share the approach taken for identifying priority agriculture BMPs, provide options for the stormwater analysis and ask the workgroup for feedback.

**10:35 BMP Interpretation White Paper: Biochar as an Amendment to Existing Runoff Reduction Practices**

Carol Wong, CWP

At the November meeting, the USWG agreed to proceed with a BMP Interpretation for biochar amendments in runoff reduction practices. During this meeting, Carol will present the draft white paper for USWG review and comment. Concurrently, CSN will convene a review team of 4-5 researchers and practitioners in order to provide further review and feedback on the draft white paper prior to a USWG decision.

**11:05 Updates on Sanitary Sewer Exfiltration and Developed Sector Nutrient Sensitivities**

Joseph Delesantro, EPA ORISE

Joseph will provide an update on his work with the Wastewater Treatment Workgroup to model the extent and distribution of sanitary sewer exfiltration. He will also re-engage the workgroup on the desire to revisit nutrient sensitivity values for the urban sector.

**11:20 Adjourn**
