

# Sustainable Oyster Fishery Outcome

OUTCOME DISPOSITION ADVICE TO  
MANAGEMENT BOARD:

ADD

**OUTCOME: Manage oysters to enhance their capacity to improve water quality through a sustainable oyster fishery and aquaculture practices.**

- PROPOSED GOAL: Sustainable Fisheries
- LEAD: GIT 1
- Engage oyster industry (wild harvest and aquaculture)
- Could be implemented in select regions as a pilot
- Explore oyster BMP as 1 option for increasing oyster populations
- Outcome should be additive (seek to increase oyster abundance)
- Critical activities:
  - Population assessment
  - Metrics for monitoring success
