# LOOKING BACK...

# WORKPLAN APPROACH

## 2022-2024 Recommended Collective Partnership Actions

- Nine actions to address needs by CBP partnership
- Multiple CBP entities identified for each action
- “Suited” for CBP—requiring collaborative partner participation, MB direction, leverages expertise
- To be completed or initiated by 2024

## Current and Planned Efforts to Advance Climate Directive

- **Jurisdictions:** Includes CBP, MD, DE, DC, NY, VA, PA (Appendix A)
- **Federal Agencies:** Includes EPA, DOD, NOAA, NRCS, USGS, NPS, USFWS (Appendix B)

# CONSIDERATIONS TO IMPLEMENT THE CLIMATE WORKPLAN

- Collective actions involve multiple portions of CBP
- Beyond the responsibility of the Climate Resiliency WG
- MB needs to decide on an option
- Three options for consideration

# OPTIONS FOR MANAGING IMPLEMENTATION

All options require additional resources

Option 1: Distributed Responsibilities— have distributed responsibilities within CBP with an annual update to the Management Board.

- Coordination for collective CBP actions under MB, GIT 6, or another approach
- Jurisdictions and Federal Agencies responsible for their actions

Option 2: Distributed Responsibilities w/ Coordination Support

- Cross-program climate coordinator position established

Option 3: Elevate CRWG to a Goal Implementation Team

- Establish a new GIT with associated support

# ACTIONS/DECISIONS

- Suggest Management Board support **Option 1**
  - Distributed management approach overseen by MB
  - Least amount of resources
- Other options could be considered in future if resources increase
