# Following Up on the Joint ITAT-Factors Team Meeting in October 2023

December 13th, 2023, ITAT Meeting

# What are our next steps for continuing tidal – non-tidal analysis?

- Tidal and non-tidal cluster analysis?
    - Set a portion of a future ITAT meeting aside to discuss if this is an approach we should follow?
- Broad tidal and non-tidal synthesis?
    - Identify a project for next year and appropriate funding source.
    - Consider scope of outreach and analysis.
- Build connections starting from a tidal project to a non-tidal project?
- Interest in forming a small group to pursue these tidal – non-tidal analyses in more depth?
- Annual ITAT-Factors Team meeting?
    - If there is some interest, we can send a poll to both groups.

# Questions to Keep in Mind

- Do we want to apply for ROAR Proposal Funding?

- How to better integrate our trends work into that of existing tools utilized by jurisdictions and implementation focused partners?

- Who is our audience and what are we trying to accomplish with explaining the trends?
