Supporting Agroforestry Implementation

Why Agroforestry?

- 5 USDA-recognized agroforestry practices
 - Benefits: water quality, and more!
- Not as widespread as other practices, but growing in popularity
 - Not all credited in our modeling tools (alley cropping, silvopasture, forest farming)
- NRCS is allocating more funding to support these practices
- Introduction to the topic today, including implementation, etc.
 - Do we want to pursue crediting these practices?

What's Next?

- Today is a primer for future discussions
 - USDA-EPA Crediting Task Force recommendation: credit more USDA practices
 - Examples from groups implementing these practices within the watershed
 - Joint Agriculture Workgroup, Forestry Workgroup, Chesapeake Bay Agroforestry Network meeting
