

October Recap

11/8/2024

October voting summary:

Request	Was consensus reached?	What does this mean?
Should the acres of Grains with Manure be determined using Plant Available Nitrogen?	Yes	We will make a change for P7
Should the manure spread algorithm be modified to create a fourth group as shown in this presentation?	No	We will keep things the same as P6
Should this new statistical framework be used to determine long term crop yield trends?	In progress	We need to talk more
Should new data sources from the poultry industry be incorporated into nutrients calculations in CAST?	No	We will keep things the same as P6.

What does this mean?

We **WILL** use **Plant Available Nitrogen** to determine the acres of Grains with and without manure.

We **WILL NOT** alter the **application of manure** nutrients from Phase 6.

We will **CONTINUE** to examine feedback on **updating crop yield** trends.

We **WILL NOT incorporate** new sources of data, as outlined in discussions, from the **poultry industry**.

Next steps:

Decide crop yield trends

Begin inorganic fertilizer discussion
