

Outcome-Specific Indicator Needs

Source of information not intended to address this topic. Nonetheless, our initial impressions:

- Wide range in how needs are recorded.
- Common action terms qualitatively assigned (by Doug) across needs:
 - design / develop (5);
 - synthesize / assess / evaluate (5)
 - execute / implement (4)
 - maintain (4)
- Difficult to understand work schedule (e.g., need-by, available-start, duration) and funding mechanism (e.g., contractor, GIT Funding, CBP Workgroups).
