

Shad Abundance (2010)

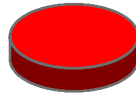

Ecosystem Health Assessment

Susquehanna

<1.0%

(York Haven Dam)

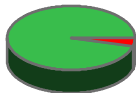

Note:

Data for the York and Potomac Rivers were provided by the Virginia Institute of Marine Science via an ongoing Catch per Unit Effort (CPUE) study involving American Shad gill-netting. Data for the Susquehanna and James Rivers represent published fishway passage values for York Haven and Boshers Dams, respectively.

Potomac
97.0%

York
20.0%

James
<1.0%

(Boshers Dam)

Baywide Weighted Index - Percent of Goal Achieved (28.3%)

Data Sources: Fishway Passage Data from Conowingo and Boshers Dams, VIMS CPUE gill-netting data
