

# May 15th AgWVG Feedback on Planning Document Objectives

# To what extent is the Agriculture Workgroup capable of achieving this objective?

Understand and evaluate ag-sector WIP progress.

Accelerate BMP implementation across the Watershed.

Enhance cross-partner communication/idea-sharing.

Expand AgWG reach through external communication and education.

Track and understand agricultural industry trends and their implications for agricultural nonpoint-source pollution.

Assess options for innovative BMP implementation programs.

Evaluate credits for BMPs not currently incorporated into the CBP's suite of modeling tools.

Regularly evaluate BMPs currently receiving credit in the CBP's suite of modeling tools.

Develop methods for verifying BMPs not implemented through traditional channels (cost share, etc.)

Leverage technology to enhance BMP verification.

Enhance understanding of, and explore crediting options for, BMP co-benefits (Benefits beyond N,P,S reduction)

Enhance focus on water quality monitoring data.

Not Capable

Highly Capable

# To what degree would achieving this objective benefit the partnership?

Understand and evaluate ag-sector WIP progress.

Accelerate BMP implementation across the Watershed.

Enhance cross-partner communication/idea-sharing.

Expand AgWG reach through external communication and education.

Track and understand agricultural industry trends and their implications for agricultural nonpoint-source pollution.

Assess options for innovative BMP implementation programs.

Evaluate credits for BMPs not currently incorporated into the CBP's suite of modeling tools.

Regularly evaluate BMPs currently receiving credit in the CBP's suite of modeling tools.

Develop methods for verifying BMPs not implemented through traditional channels (cost share, etc.)

Leverage technology to enhance BMP verification.

Enhance understanding of, and explore crediting options for, BMP co-benefits (Benefits beyond N,P,S reduction)
