

Ag Modeling Team Charge/Nominations Feedback

Tom Butler, EPA

07/21/2022

Purpose of Today

- Seek consensus approval of the updated AMT charge and group structure
- IF approval is given begin accepting AMT nominations

Background

We need to ensure the best available agricultural input data is in the
Phase 7 Watershed model (WSM)

AND

Reviewing this information is a very detailed, time expensive task

BUT

The Agriculture Workgroup does not have the capacity to do this

THEREFORE

We are making the Ag Modeling Team to decide the ag inputs for the
Phase 7 Model.

Charge and functions

Support the Agriculture Workgroup (AgWG) through the development of the Phase 7 Watershed Model (WSM) inputs.

Ensure Phase 7 utilizes the best available information reflecting agricultural conditions and changes through time.

Determine if changes are appropriate from Phase 6 to Phase 7.

Consider land use/load source category changes.

Coordinate with USDA agencies to identify analysis methods and agricultural databases.

Make decisions on what the most appropriate agricultural input data are for the Phase 7 WSM.

Structure (Consensus)

****The AMT will make decisions itself****

1) Discuss item

2) Form Proposal

3) Call for consensus

4) Identify and address concerns

5) Modify proposal
