

Thoughts on Biennial SRS meeting in Jan/Feb 2019: “Rounding the curve on adaptive management” (or “Nothing is Optional After Today”)

Basics

How to structure – use reviews from last year to inform the agenda

Where to have it – What about Hershey Lodge or NCTC? **Pick a place now**

When to have it? January/February 2019 **Set a date now**

Who should be there? Management board, workgroup chairs

Panelists/moderators from **outside the inner circle – start recruiting now**

What should be the output from this?

Put **money aside in EPA budget now**

Elements

Bay Barometer release just before to inform management decisions

Panels on the following, to include identified experts and local folks: Science, Fiscal and Policy

“We are Trailblazers”: Synthesis of what we have seen and done this last 2 years – Bill Dennison or Scott Phillips or another voice

Objective report card on SRS by STAC Gurus Kirk and Carl (Good, Bad and Ugly) including things we learned and things we did not know we learned

Syncing timing of reports on outcomes and milestones that are jurisdiction specific (Nicki Kasi issue)

What did we get from SRS (examples and stories from the front-line goal teams)

Finance 201: SAV finance as a microcosm prototype for Conowingo

Dealing with uncertainty, numeric targets or not?

Wild ideas:

Partnership viewpoint survey/organization assessment

Are we living up to the Principles and Vision we signed onto in 2014 Agreement?

Rules

Incorporate more interactive components

Get people moving

Fun

Do not start anything before 9 am
