

Work Plans and Management Strategies: Status Update

Part of the Strategy Review
System (SRS)

David Goshorn, Chair, GIT 6

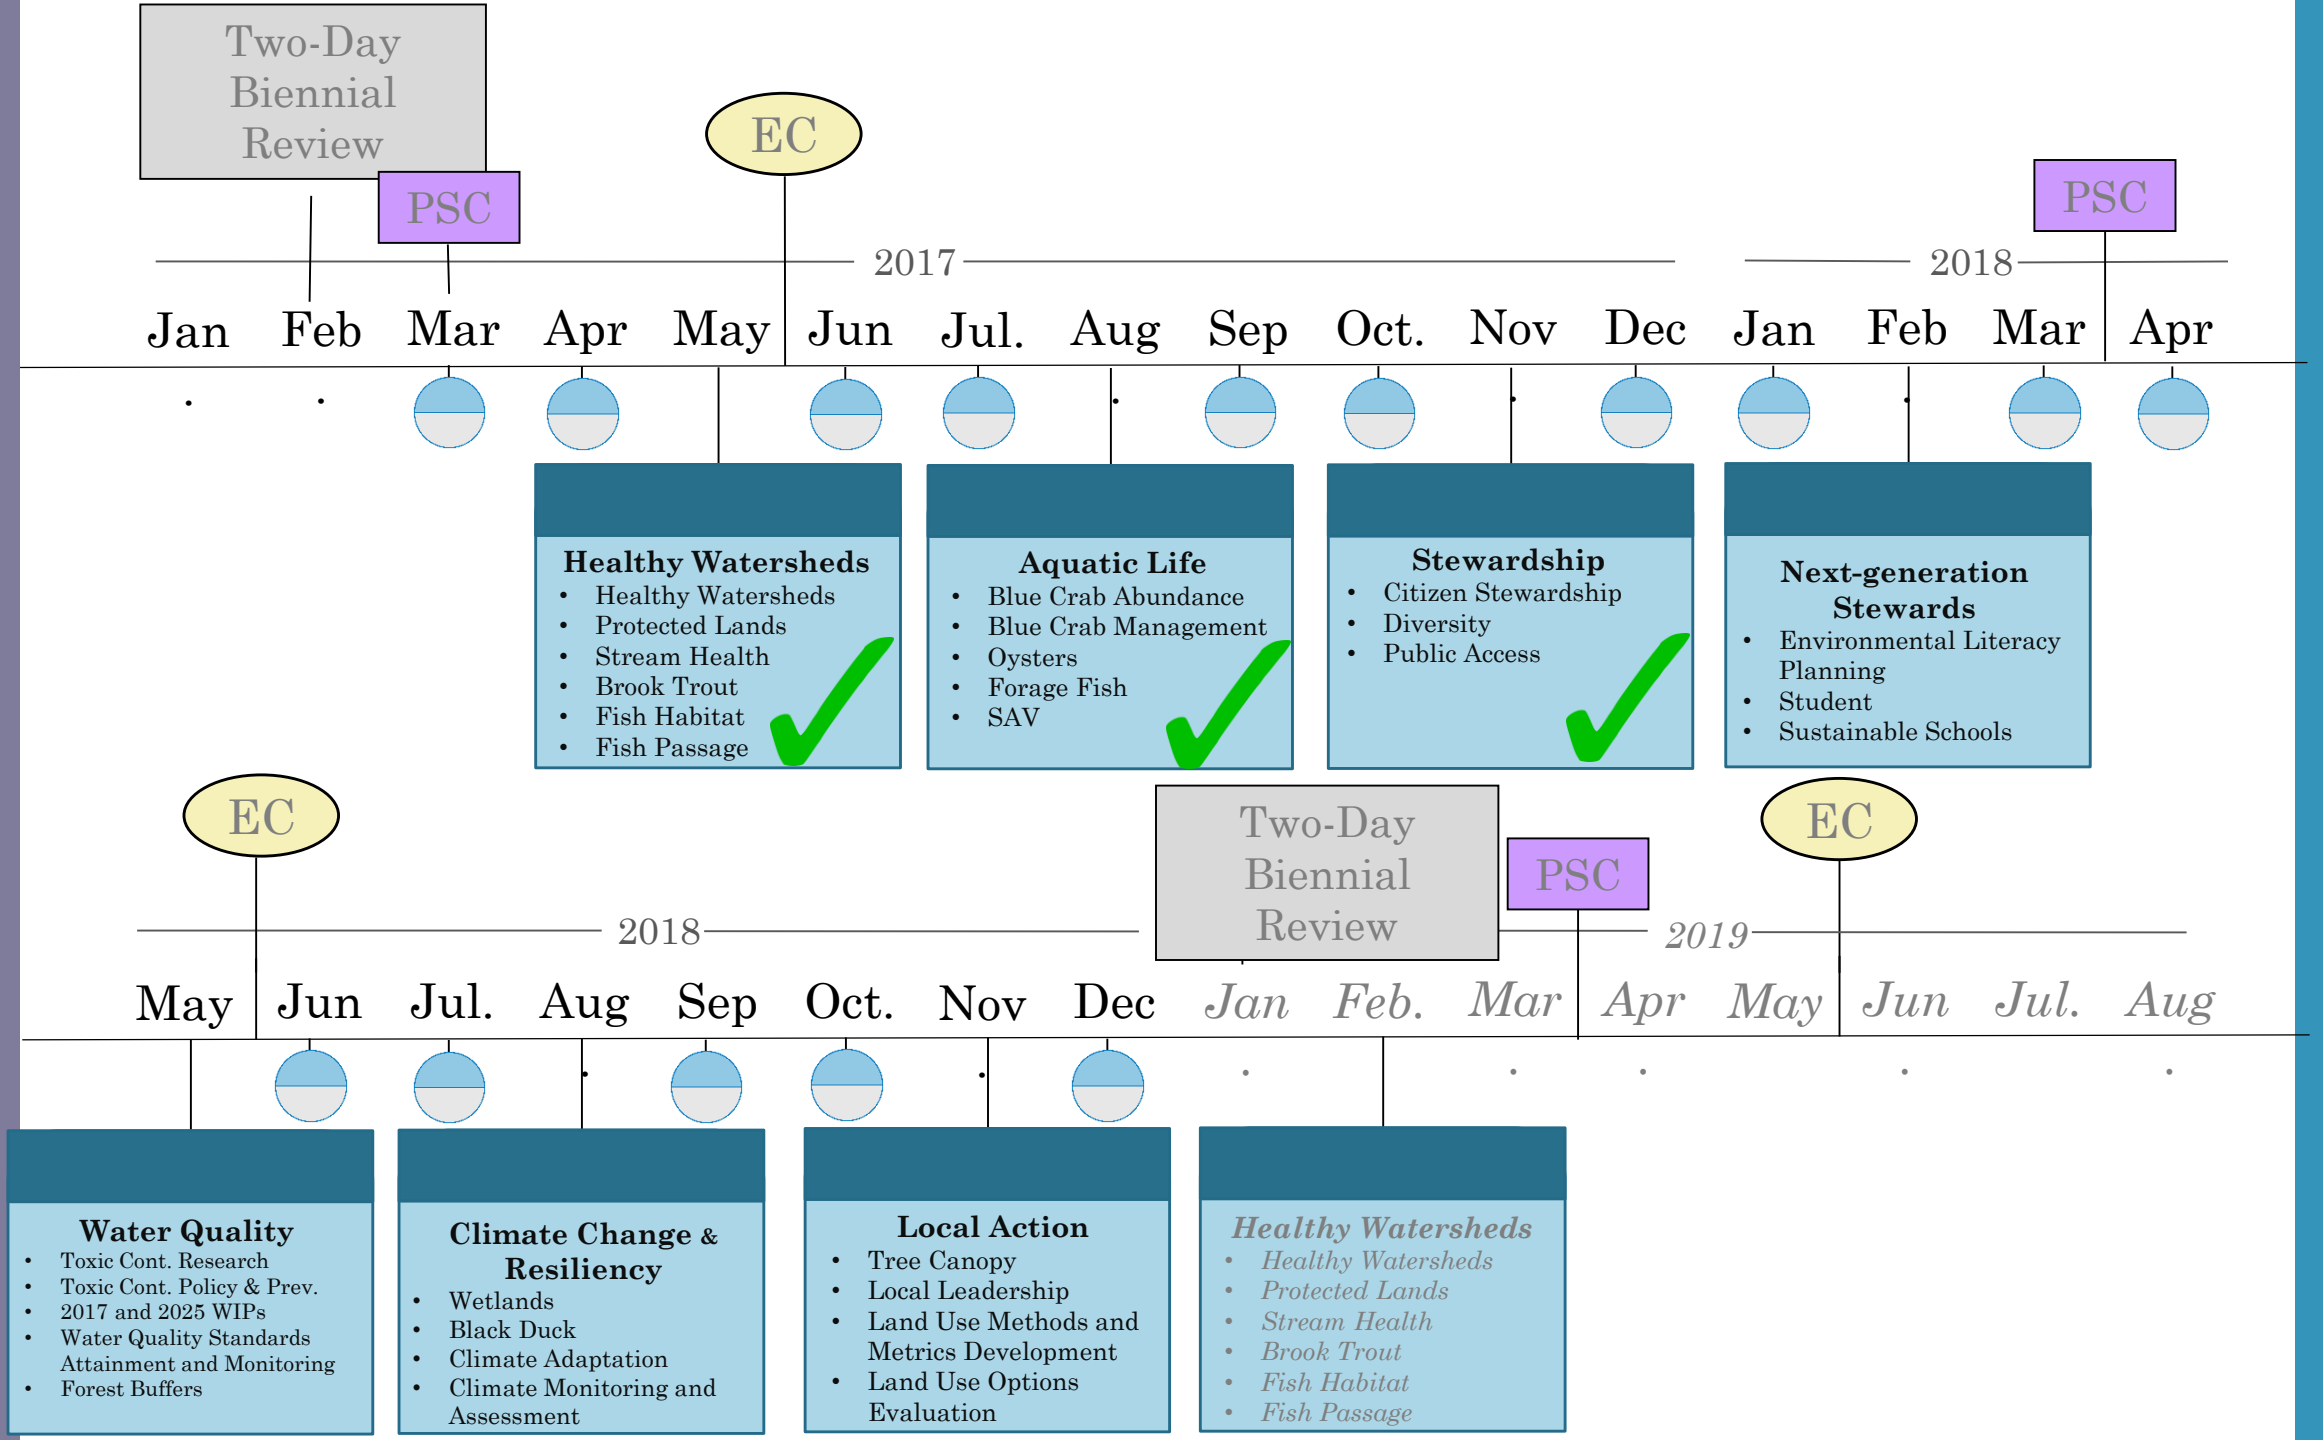

Presenting to Management Board

April 12, 2018

From the 2014 Watershed Agreement

“The signatories and other partners shall thereafter update and/or modify such commitments every two years.”

“The Principals’ Staff Committee will ... report on implementation of Management Strategies every two years.”

2-Year Work Plans

Completed updates, updates in progress, and outstanding work plans

Completed Updates

Forage Fish

Brook Trout

Fish Habitat

Oyster

Citizen
Stewardship

Healthy
Watersheds

Public
Access

SAV

Diversity?

GIT 6 Recommendation: Accept as revised

Completed Updates

SAV

Diversity?

Outstanding Work Plans

Diversity?:

Resolving jurisdictional comments

Blue Crab (one work plan for Abundance and Management outcomes)

Factors phrased as actions, need to mention completion of allocation evaluation

Stream Health:

Logic table not completed, Work Plan in proper format

Protected Lands:

Logic table not completed, not in consistent format

Fish Passage:

Language consistency, Acknowledgement of meeting target, but how do we adapt?

Outstanding Work Plans

Diversity?:

Resolving jurisdictional comments

Blue Crab (one work plan for Abundance and Management outcomes)

Factors phrased as actions, need to mention completion of allocation evaluation

Stream Health:

Logic table not completed, Work Plan in proper format

Protected Lands:

Logic table not completed, not in consistent format

Fish Passage:

Language consistency, Acknowledgement of meeting target, but how do we adapt?

GIT 6 Recommendation: Allow GIT 6 to work with Outcomes and revise for acceptance July 1

Management Strategies

Updating Management Strategies is a sign of learning – and adaptive management.

Updated Management Strategies

Three proposed updates:

1. Change from “Version 1” to “Version 2”
2. Add BRIEF section at top of “Lessons Learned”
3. Update “Factors”, Current Efforts and Gaps”, and “Management Approaches” to be consistent with updated Workplans.
4. OPTIONAL – update other sections to be consistent.

By July 1, 2018

Updated Management Strategies

1. Change from “Version 1” to “Version 2”
2. Add BRIEF section at top of “Lessons Learned”
3. Update “Factors”, Current Efforts and Gaps”, and “Management Approaches” to be consistent with updated Workplans.
4. OPTIONAL – update other sections to be consistent.

By July 1, 2018

GIT 6 Recommendation: Allow GIT 6 to work with Outcomes and revise for acceptance July 1

Where can I find updated Management Strategies and Work Plans?

2 places on www.chesapeakebay.net

Engaged Communities

The long-term success of the Chesapeake Bay restoration effort depends on the work of individuals and communities living throughout the watershed. Connecting with current environmental stewards and encouraging future local leaders helps build the network that will keep our work moving forward.

Oysters

On an individual
Outcome's page

Filter-feeding oysters and their reefs can improve water quality and provide habitat for invertebrates and fish. These native bivalves are an iconic Chesapeake Bay species that has been decimated by pollution, disease and historic overharvesting. Restoring and protecting oyster reefs in Bay tributaries would reestablish the species and provide important ecosystem services to the Bay.

- Read the [Management Strategy \(PDF\)](#)
- Download the [Draft 2018-2019 Oysters Work Plan \(PDF\)](#)

Outcome(s)

Oysters Continually increase finfish and shellfish habitat and water quality benefits from restored oyster populations. Restore native oyster habitat and populations in 10 tributaries by 2025 and ensure their protection.

Recommended Actions

1. Accept Forage Fish, Brook Trout, Fish Habitat, Oyster, Citizen Stewardship, Healthy Watersheds, Public Access, SAV, and Diversity (?) Workplans as “Revised”
2. Charge GIT 6 to work with Blue Crab, Stream Health, Protected Lands, Fish Passage, and Diversity (?) Outcomes to finalize revisions and come back by July 1 with recommendation for acceptance.
3. Charge GIT 6 to work with all Outcome leads to update Strategies as per description and come back by July 1 with recommendation for acceptance.
