9:35 am   **Measuring Progress in Restoring Stream Health**

Participants of last year's "2008 Baseline" workshop selected the 6-year period of 2006 - 2011 as the stream health baseline. Progress in restoring stream health can be measured in sequential 6-year time blocks. Some stream data for the 2012 – 2017 period--the first 6-year period after the baseline--are already in the Chessie BIBI database but the record is by no means complete. CBP would like to send out a data call for additional 2012 - 2017 data.
