**9:40 Dry Runs of Healthy Watersheds Cohort Presentations**

There are 6 CBP outcomes, organized under Healthy Watershed Cohort, that will be reviewed by the Management Board on August 15. The dry run for STAR provides an opportunity for each outcome to provide their MB presentation, and get suggestions for improvements. The presentations should follow the guidelines provided under the Strategy Review System, and on Chesapeake Decisions.

In addition to providing suggestions on the presentation content, STAR will be looking to discuss the following questions to keep up to date on science needs and climate resiliency activities:

- Do you have any additional science needs that were identified through the review process?
- Have you identified gaps in resources to address your science needs?
- How do you plan to address Climate Resiliency as you revise your Management Strategy and Work Plan?
