

Responding to the PSC Request to Improve the CBP Monitoring Networks

Lee McDonnell, Peter Tango, Breck Sullivan, Scott Phillips, Denice Wardrop

Principal Staff Committee Meeting
May 17, 2022

## Recap: Interaction with Principal Staff Committee

 PSC request to enhance monitoring (Jan 2021)

 STAR-STAC leadership team conducted a CBP monitoring review (March 2021-February 2022)

 Draft report delivered and CBP community review (March-April, 2022)

 Response to comments (underway May-June 2022)

Report finalized (May-June 2022)

CBP Partnership Monitoring Networks: Annual Monitoring

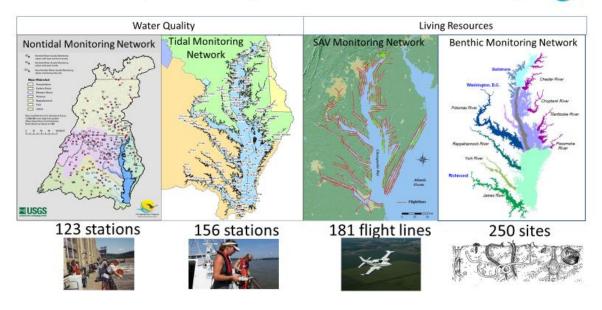

# Path forward: Interaction with Principal Staff Committee

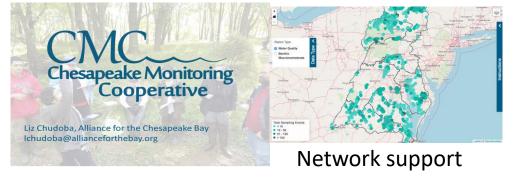

CBP Partnership Monitoring Networks: Annual Monitoring

**\*** 

- Next steps for PSC and today's ask
  - Identify monitoring leaders
  - Kick-off partnering meeting
  - More detailed discussions
  - Yearly check-in

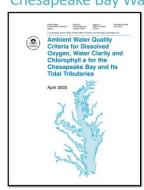

# Reminder: Report recommendations developed around 3 themes

 Assessing tidal water quality standards to support living resources

 Evaluate implementation priorities for watershed-based outcomes

Document CBP progress toward Watershed
 Agreement goals and outcomes

Chesapeake Bay Water Quality Standards

BEST MANAGEMENT PRACTICES (BMP'S)

## Reminder: Key Findings of the Report

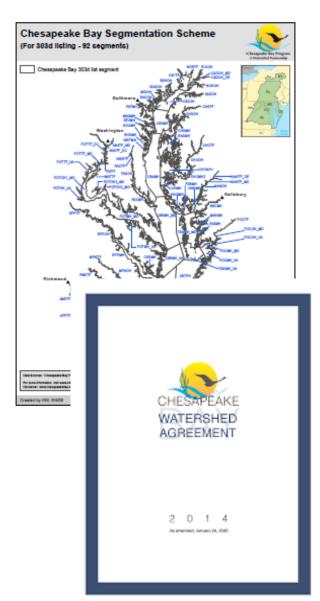

## Monitoring is critical

- Return on investment: Monitoring shows CBP partners progress towards goals from restoration efforts
- Need to maintain and enhance core CBP monitoring networks
   AND partner monitoring programs

# Key Findings of the Report

- Monitoring for many CBP outcomes is insufficient
  - No segment of the bay has assessed all water-quality criteria, and therefore can't be delisted!
  - Some Outcomes need a more coordinated effort to track progress
  - Some Outcomes lack information to assess progress

## Key Findings of the Report

Opportunities for fundings exist

 The CBP partners <u>committed to achieving these outcomes</u> have a unique opportunity to build monitoring capacity.

## Major report review comments

 Majority of jurisdictions plus federal agency partners provided comments (Thank you! Really helpful!)

## Major report review comments

- Comment highlights
  - Better identify priorities
  - Provide more details on activities aligned with monitoring (such as data management)
  - Implement recommendations and pay for monitoring

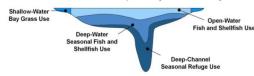

# Better identify priorities

## Initial priorities have been identified

- Nearterm priorities
  - Maintain existing monitoring networks
  - Address regulatory requirements:
    - CBP outcomes for Attainment of standards
  - Monitoring for CBP outcomes that are behind schedule
- Extended priorities:
  - Expand support for watershed outcomes that don't currently have monitoring

#### Refined Designated Uses for the Bay and Tidal Tributary Waters

A. Cross Section of Chesapeake Bay or Tidal Tributary

B. Oblique View of the "Chesapeake Bay" and its Tidal Tributaries

# Provide more details on activities that align with monitoring

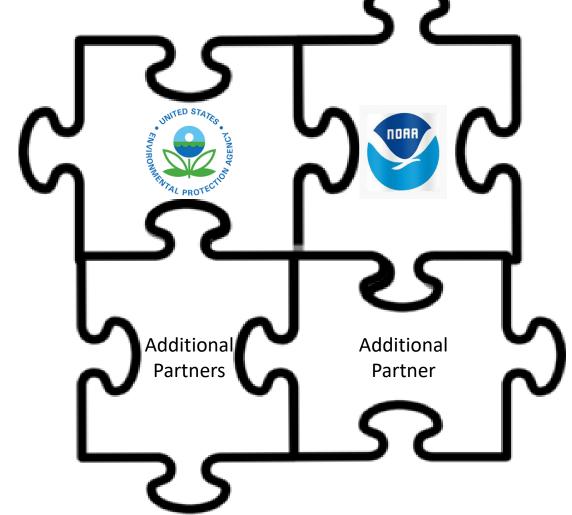

The report provides an a la carte menu of choices to enhance monitoring

- Priority data collection needs were the focus of this review
- Data management, analysis and reporting were recognized as important but not emphasized. These will be discussed during the monitoring implementation phase.
- The analysis framework already exists and will be improved through enhanced monitoring.

Implement recommendations and pay for monitoring

- Need a multi-partner approach to invest in gaps.
- Partners can identify which monitoring items they want to support
- Example: Hypoxia collaborative

# Several partnerships are already developing for identified priority investments!

Hypoxia network

## Kick-off meeting: based on CBP needs assessment

Core Networks now. More networks to come.

Core

Networks:

**EPA** 

investment

(grants & IAG base

funds): \$5M

Core

Networks:

**Partnership** 

investment

(leverage

grants &

IAGs): \$7M

Partner Led Networks

Ex: Blue crabs

Oysters

**NEED**: \$2.08M

for addressing

unassessed

**WQ** criteria

**NEED: \$2.56M** 

for response to

management +

\$0.3M for PCBs

**Toxics** 

### **NEED**:

Support for additional monitoring to address Agreement Outcomes

# Kick-off meeting: Work together with investment menu (subset of line items shown from the report)

### **Tidal Water Quality \$**

- Program maintenance
- Hypoxia network 8 arrays
- 4D water quality interpolator
- Nutrient limitation surveys

### **Nontidal Water Quality \$**

- Program maintenance
- Conowingo Continuous monitoring
- River input continuous monitoring
- Small watershed studies

### Tidal SAV assessment \$

- Al satellite image interpretation
- Automated Polygon method development
- Sentinel site network
- Assessment calibration
- Pilot study of proposed satellite assessment on spring grasses

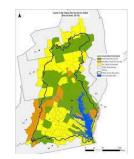

### Land Use Land Cover \$

High resolution imagery

- Database enhancement for SAV
- SAV and nitrate field monitoring

Today's Ask: PSC and CBP work together to implement recommendations

• There would be a kick off meeting of monitoring program managers to begin to implement short and long term recommendations.

• PSC identify program managers for this meeting. Example: Lee McDonnell (EPA)

- The Review Team suggests an annual update of the monitoring investment and implementation progress to the PSC.
  - STAR will coordinate development and maintenance of new network portfolios
