

Wastewater Treatment Workgroup (WWTWG) Conference Call

Tuesday, April 2nd, 2013, 10:00 AM- 12:00 PM

Conference Line: 866-299-3188, **code: 267-985-6222**

Adobe Connect: <https://epa.connectsolutions.com/wwtwg/>

****Please note the conference line code is different from previous months****

10:00 AM	Welcome and Introductions	Spano
10:05 AM	Action Item: Approval of March WWTWG Minutes	Spano
10:10 AM	Wet Weather & Point Source Load Evaluation	Spano/George

As discussed during the Workgroup's previous conference call, Maryland is proposing new annual progress evaluation methods for point source loads. A final decision on the issue will not be determined by the Workgroup, but Tanya and Jim will lead discussion to determine the workgroup's recommendation.

Action Requested: The workgroup will be asked to determine its recommendation to the WQGIT.

11:10 AM	Non-significant & industrial facilities data	Zhou
----------	---	------

Ning will discuss options and methodologies available to the jurisdictions to improve their nutrient loading data from these facilities. He will also discuss methods to calculate net loads from industrial plants with river uptakes and defining no-net-contribution dischargers.

Feedback Requested: Workgroup discussion and input is requested.

11:30 AM	Septic panel update	Tetra Tech
----------	----------------------------	------------

11:40 AM	WWTWG Work Plan & Schedule	Spano
----------	---------------------------------------	-------

Tanya will outline a proposed format for organizing the activities of the Work Group over the coming year, and coordinating the timing for Work Group discussions over the next few months.

Feedback Requested: Workgroup will be asked to identify any additional topics for discussion/consideration at upcoming meetings/calls.

11:50 AM	Updates	Open to the Workgroup
----------	----------------	-----------------------

12:00 PM **Meeting Adjourned**

Spano
